### 2013 Full-Power, Under \$500,000 Sonic Rig Released

Canada – Loaded with features and a full-size Sonikor 50K drill head, the compact SDC-375 is the newest member of the Sonic Drill Corporation family. Specifically designed to meet the needs of smaller companies that have long asked for a more affordable sonic drill rig, the SDC-375 is the first Sonic Drill Corporation rig to be offered at a price just under \$500,000 US.

"The market has been asking for a more economical, compact rig but one that comes with the same full power as the larger sonic rigs," says Kevin Reimer, sales and operations manager for the Sonic Drill Corporation.

"We're delighted to be able to offer the new SDC-375, especially designed for small and mid-sized clients that want to switch to a sonic drill rig," adds Reimer.

Unlike other smaller and less powerful rigs, the SDC-375 comes with numerous features (including a rod handling option) and the ability to core and drill to 300 ft. and beyond — far deeper than the standard 150 ft. for comparable-sized models.

Small enough to be shipped in a 20' shipping container, the SDC-375 comes track-mounted or in a truck-mount configuration, if required, and fully supported by Sonic Drill Corporation's industry-standard one year warranty. For its under \$500,000 price tag, the machine also comes fully-optioned and work ready with one week of operator training included.

Award-winning sonic drill rigs, patented and built by the Sonic Drill Corporation, have worked efficiently and profitably on thousands of drilling projects around the world. Today, Sonic Drill Corporation rigs are in use in six continents and in every application imaginable.
